A STATEMENT OF POLICY

The Tree is open to contributions from all undergraduates in the College, that can move the students' views on the subject, as well as one that may be entertaining.

On its present pages, The Tree is open to contributions from all undergraduates in the College, that can move the students' views on the subject, as well as one that may be entertaining.

The Tree is the voice of the student, and in some cases, it will be our duty to criticize as we see fit. But it shall be our policy to criticize constructively, in spirit at least, in all that it can comment on.

The Tree is the voice of the student, and in some cases, it will be our duty to criticize as we see fit. But it shall be our policy to criticize constructively, in spirit at least, in all that it can comment on.

The people about them down, and even more intense, are the people about them in life. The Tree is the voice of the student, and in some cases, it will be our duty to criticize as we see fit. But it shall be our policy to criticize constructively, in spirit at least, in all that it can comment on.

Junior Varsity Loses

end. In this week’s game, half-time found St. Stephen’s leading with a score of 13 to Red Hook’s 4. But within the first few minutes of the second half the visiting five scored two baskets and a foul shot, after which it was nip and tuck all the way, with neither team ever leading by more than three points. With only one point difference in the scores, the last moments of the game were particularly exciting.

Kates was the high scorer for St. Stephen’s in both games, accounting for eleven points in the first game and six in the second.

RED HOOK: Mason for Bald, V. Clarke for Kates, R. C. Clarke for Schmidt, Hancock for Lewis, T. Clarke for Malmodano, Kates for R. C. Clarke, Bald for Mason, Schmidt for Mason.

According to the Syracuse Daily Orange, more than 50% of the undergraduates in the American colleges are concerned by student or faculty councils.

“Twenty-one decimal forty hours per week is the average amount of studying done by the students of this university,” announced Dr. N. M. Eastman, president of the University of Toronto.

By way of illustration that education has its sloughs, the following clipping from the February 9th issue of the Boston University News is given in full:

MERELY 10 PER CENT

To the Editor of the News:

Some time ago I sent you an estimate of the number of the fifteen members of the Lock-honoring committee on scholastic probation. It appears the students in the sophomore class, were busy with extra-curricular activities at the time they were given their low grades, and for that reason the above do not deserve mention.

Incidentally, if the Nikon looks with an unexcelled attitude toward Lock, why does it not punish how many of the honor students are on probation? They should do what you do.

A. A. A., Sophomore, C. E. A.

Hi! Note: From official sources it was learned that of the 15 men in Lock, full are now on probation. Five of them are members in scholastic probation; three are in the first semester. Only one Lock man was removed from probation: time, however, is taken in another member. This leaves the percentage constant at forty percent.

There are no NIKONs as on probation. The average for the staff is 22 according to the index system.

According to page 51, section 10, paragraph 6 of the C. E. A. Catalogue, “a student on probation will be required to withdraw from the college of his term in the junior or sophomore year.” This means that five members of Lock are automatically required to withdraw from college, if the rules of the college are to be observed.

Exchanges

One of the courses offered to students at Oklahoma A. and M. College is “art culture.” This seems like a very attractive subject, but in order to prevent any misunderstanding in this, there is a rule in the catalogue which says, “study of popular art and leisure.” For our study of art culture at Oklahoma A. and M. College is “art culture.”

Dr. A. A. Bith, a New York psychologist, took in American students who asked the clipped accents of Oxford and Paul Moll. “The Oxford accent is very more and less specific, especially in the small area of the brain which is related to phonetics.”

The Oxford accent is not a phonetic term, but one that is widely used in British English, and is often confused with the American accent.

A professor in the department of biochemistry at the University of Toronto, speaking on the subject of learning and memory, told this: “A student on probation will be required to withdraw from the college of his term in the junior or senior year.”

This means that the number of members in Lock who are required to withdraw from college is not specified.

An anthology of poetry written by English students during the last thirty years by undergraduates at Tufts has just been published.

At Gleevers College, coeds are allowed to smoke in their rooms if they provide fire extinguishers.

“Lucky Strike! It’s toasted!”
