ANNANDALE-ON-HUDSON, N. Y., NOVEMBER 2, 1923

No. 3

VARSITY OVER- WHELMS WORCESTER

SCORES 32-0 VICTORY OVER
POLYTECHNIC INSTITUTE

On October 27th the Varsity came to life and defeated Worcester Polytech, 32-0. Scoring a touchdown in the first few minutes of play, St. Stephen's was never in danger of losing. Worcester was completely outclassed and made but one first down, when, in the final period, they completed two successive forwards for a gain of twelve yards. In contrast, the Varsity's attack was strong and consistent, and fumbles at inopportune moments were all that kept the score down. Straight line plays and end runs, with an occasional pass, gained steadily during the first half. When, in the second half, the Varsity opened up with all its plays, Worcester was simply swept down the field. Out of twenty-two attempted forward passes, twelve were completed for a total gain of three hundred and sixty yards.

First Period.

Captain White lost the toss, and Worcester chose to kick off. The kick was short, and Coffin caught it on his thirty-five yard line and ran it back five yards before he was downed. Worcester recovered a St. Stephen's fumble, but immediately lost the ball by a fumble of their own. White circled Worcester's left end for a first down. Deloria and Kilby added another by plunges off tackle. A forward pass to Wilson gained fifteen yards. Successive line plays by Deloria and Simmonds placed the ball on Worcester's five yard line, from which point Deloria took it over. An attempted placement kick for the extra point was wide of the goal.

Worcester's kick-off was again short, Coffin being downed on his thirty-five yard line. The Varsity was held for downs, but in turn forced Worcester to punt. The kick was hurried and consequently poor, and rolled back behind the point from which it was kicked. It might well be said here that all during the game the St. Stephen's forwards were thru the line so fast that not one good punt was made by Worcester. The period ended with the ball in the Varsity's possession near the center of the field. Score at the end of the first quarter: St. Stephen's 6. Worcester 0.

Second Period.

The Varsity lost the ball on downs when two forward passes were incompleated. Worcester could not gain an inch—in fact they lost several yards—so they punted. St. Stephen's fumbled the catch and Worcester recovered it, but was

"ISOLATION" AN IGNORANT TERM SAYS REDFIELD

UNITED STATES CANNOT RE-
MAIN ALOOF, HE DECLARES
IN LECTURE HERE.

Lecturing in Memorial Gymnasium the second of the Dragon Lectures for the year, the Honorable William Redfield, statesman, and late Secretary of Commerce, made a striking plea for the reversal of the belief that the United States should remain aloof from the rest of the world. To achieve his point he paraded before his hearers an overwhelming array of facts which show our absolute economic dependence upon other nations. These facts he presented in such a graphic way that none could fail to be interested or to acknowledge the truth of his assertions. That when he was through he had his hearers enthusiastically on his side on the "Isolation" question, there was no doubt whatever.

He began his lecture with a warning against half truths,—truths that mislead. Public life, he said, is always full of them. Statistics telling only accertained results are a pregnant source of half truths. To understand the entire truth we must discover the forces at work which act to change results. A mere cursory glance at statistics, such as is given by most people, reveals the fact that the exports of the United States are enormous, and the imports are small in volume. From this arises the impression that the world needs us but we do not greatly need the world, as well as other varieties of spread-eagleism. The utter fallacy of this theory he proceeded to show by giving one example after another of our dependence upon other nations for even the most ordinary necessities of life. His homely illustrations included a loaf of bread, a tin can, and a piece of oil cloth. For our bread we depend upon binding machines which use seisel from Yucatan; for our tin

TRUSTEES BACK EXTENSIVE PROGRAM

\$122,000 SUBSCRIBED AT QUARTERLY MEETING

TWO NEW BUILDINGS TO BE ERECTED NEXT SPRING

On October 21 President Bell announced that the sum of \$122,000 the largest amount of money ever given at one time, had been received by the college. It represents the start of an endeavor to raise a still larger sum for the purpose of filling long-felt needs which have been retarding the progress and development of the college. The complete program calls for the expenditure of \$226,000, which amount is not to be raised by any public campaign but by private solicitation. By the first of the year it is expected that the amount will be fully subscribed.

The Trustees, after having adopted this program, decided that enough money was already on hand to justify them in going ahead with the construction of the science building and of another dormitory. Messrs. Nichols and Gardinier of Albany have been engaged to prepare plans and specifications at once, on the basis of preliminary sketches submitted by them two years ago. According to these preliminary sketches there will be forty rooms in the new dormitory, each of which is somewhat larger than the rooms of Seymour and Hopson Halls. In the basement there will be a large common room for the use of the students who will live in this dormitory. Since the building is three stories high in front and four in the rear, this basement room will have plenty of light and air. The science building as at present contemplated is also three stories high in front and four stories high in the rear. On the basement floor there will be three large lecture rooms. On the first floor the Department of Physics will be housed, on the second the Department of Chemistry, and on the third floor the Department of Biology. The general laboratory on each floor will be supplemented by research rooms, instructor's laboratories, mus-

iums, and branch libraries. The Department of Physics will also have a dark room and machine shop, and the Department of Biology will have a commodious green-house, and a dark room. The building will also include a science lecture-theatre with banked seats. It will be fully equipped for demonstration, and will seat seventy men. In this building there will also be a large paneled room with a fireplace; it will be used as a faculty club.

The buildings will be attached to the north end of Hoffman Hall, and will be built at right angles to the present stone buildings, extending east almost as far as the front line of the gymnasium. They will be constructed, in similar manner to Wardens' Hall, of field-stone with Indiana lime-stone trim. The structures will be absolutely fireproof throughout, and no wood whatever will be used in their construction.

An interesting feature of the science building will be the arrangement for light. The entire south wall of the building, facing the court between the stone buildings and Orient, will be constructed of steel and glass, making of it practically one continuous window. In addition to this, the biology laboratory will be lighted by large sky-lights. Every effort is being made to see that the science building embodies the latest discoveries and developments in laboratory building.

Ground will be broken as soon as the frost is gone in the spring, by which time a large proportion of the steel and cut stone will be ready. While it is expected that the buildings will rise more rapidly than did Wardens' Hall, the college is not counting on occupying them before January 1, 1925.

When these buildings are completed, approximately an even half-million of dollars will have been added to the assets of the college within the last four years. This is, as far as we can find out, the most rapid development that any Church college has had in a similar period, and represents over twice as great an expenditure as has been made by any of the other four colleges during the last four years.

The donators who made contributions towards this project are:

Mr. E. F. Albee, for the new dormitory\$65,000
His Excellency, A. B. Houghton 10,000
Mr. Haley Fiske 10,000

FROM BOUGH TO BOW

The reign of gold is at an end, and the discarded glory of autumn goes up in puffs of acrid smoke. Now fumes of coffee scent the midnight air, for the half-term papers are due; and robed figures stumble up dark stairways in search of cups of sugar and cans of Dairylea. "Go to, 'for the door is now shut, and I am with my children in bed;' and anyway you never brought back those spoons."

We too have our plaint to make, for Pegasus has come down to graze in the Zabriskie pastures. After reading the first two or three fall sonnets we sneaked home and burned our own most recent verses. While yet they shimmer in the brain of the youthful poet how like they are to the leaves of summer,—how green, how succulent! And when once they have been brought to earth how like they are to the fallen leaves of autumn,—how dry, how dead, how ready for the dump! Where now are those love-lyrics full of self-abnegation, every one of which began with "I?" Where now is the metrical editorial on the downfall of Europe, the comical-tragical one that started.

"Red rust, and moth wings, and shadows in the dark;"

Down goes the franc again: God save the mark?"

The last ashes have swirled up the chimney, and nothing but a headache remains.

Yet that literary issue must go to press.

Why must it? Of late we have received letters from several promising alumni, who have seen fit to write as follows,—"Enclosed try and find the two dollars, but don't bother to send the *Messenger*. Why do you put out the literary magazine at all? We graduates don't care a hang about it. We want the news. We have no interest in reading the output of two or three of the would-be journalists of the campus." May we add a post-script? "If this be encouragement, make the most of it."

We can recall the time when we rejected manuscript from a number of the men of whom the one quoted above is typical. Perhaps that is why they do not appreciate our editorial efforts. Not that we belong to the ranks of those who would persistently water the spark of early genius: we leave that to our correspondents. But, quite apart from any other advantages which may be derived from a college literary publication, do we stand up for the chastening and disciplinary aspects of setting a conscious foot to paper as often as may be. We have never felt the same in our own conceit since first the linotyper took our stuff and worked his will upon it. Invariably we have gone and tired to amend; and although our Underwood has never become as a tinkling cymbal, responsive to our every mental form and pressure, yet we have no longer the sounding brass to join Mr. Mencken and howl "undergraduate for life" whenever we see a freshly printed page. Not even when Mr. Charles Rann Kennedy brings out another version of his perennial play, or our esteemed alumnus of the *Freeman* lets some sophomoric explosion break in upon the tenor of his mature thought. If the soup is to be dishd the pot must be kept boiling, no matter what the danger that it may bubble over from time to time. To reverse the proverb, too many soups never spoiled the cook. Why discourage us? The task we face is difficult enough. As one of our contributors puts it:

"Goddess of Poetry, I pray
For one lone song divine;
A fulsome heart my offering
Before your crowded shrine.

"Towards you I would approach—
Labor and love incline—
But Circe-like you raise a wand,
And cast me with the swine."

"ISOLATION" AN IGNORANT TERM SAYS REDFIELD

(Continued from page 1)

for tin cans we go to Singapore and for oil used in the process, to Africa; for our oil cloth, jute is required from Hindustan. A man could not live in America a day, he declared, without using foreign products, for he would have to go unfed, unsheltered, and unclothed.

Turning from economic products, he proceeded to disclose the great financial dependence which this nation had upon other nations until very recent years. He told of the great poverty of the United States at birth, its lack of credit, its indebtedness to Russia for not being beaten in the Revolution, and brought forward the little known fact of Russia's aid to the Union during the Civil War. "This nation was born," he said, "as the international child of five nations,—Russia, Prussia, France, Holland and Spain."

Proceeding to a later period in our history, he pointed out that all the railroads south and west of Chicago were built by foreign capital, and that it has only been since 1914 that our heavy foreign debt has been cancelled and we have become a creditor nation. We are interested directly, he said, in Europe's recovery; first, because of the enormous debts owing to us, and secondly, because we are suffering from the small foreign market. The lack of foreign buyers of wheat directly affects the purse of the Middle West farmer.

In concluding he said that he had endeavored to paint a picture of the world as it actually is, a world in which the saying, "of one blood all nations of men," is economically true. "Our lives are tied to millions of others around the globe," he declared, "and isolation is impossible either in fact or in spirit."

New Appointment in Science Department

Dr. D. G. Foster Called to Chair of Chemistry

Last week Mr. Donald Graham Foster was appointed to fill the chair of chemistry. Mr. Foster did his undergraduate work at Harvard, where he also took his Masters degree in chemistry. From there he went to Johns Hopkins, where he took his Ph. D., also in chemistry. He has assisted in his subject at Harvard, and has spent one year as instructor in organic chemistry in Simmons College. During the war he was instructor in military science and tactics in an officers' training school, and during the summer of 1922 he was engaged in similar work at Camp Devens, Ayre, Mass.

Scrubs Lose to Newburgh 12-0

In a well played game the second team lost to Newburgh High School at the latter's grounds on October 20, by a score of 12-0.

Captain Clark won the toss and elected to kick off. The first quarter produced nothing in the line of spectacular plays, each team relying mainly on the defense and gaining little. In the second quarter however, Newburgh rushed the ball to the Crimson one yard line on a series of brilliant end runs. Here the defense of the scrubs stiffened, and the line held firmly for three downs; but on the fourth an opposing back scrambled through left tackle and guard for a touchdown. The kick for the extra point was too low. Newburgh kicked off to the Crimson ten yard line, and Raymond ran the ball back thirty yards before being tackled. The half ended shortly after, with the score 6-0 in favor of the opponents.

Newburgh received at the start of the third quarter, and thereupon marched down the field to the second's twenty-five yard line. Here Coleman, the opposing left half back, made a pretty run around right end for a second touchdown. The kick was again missed. Newburgh kicked off, and at this stage of the game the scrubs showed to advantage some good defensive work. Due to the splendid efforts of Clark, who made several long runs, the ball was advanced to mid-field, where the game ended a few seconds later.

In the second half Newburgh revealed a pretty triple shift formation, and made gains continually through its use. Coleman played the best game for the opponents while Clark, Strader, and Ritchie were the shining lights of the Crimson team.

Chapel Notes

Bishop Davies and Dr. Gavin are Preachers at Chapel Services

The college has been favored recently by sermons from two distinguished clergy of the Church, the Right Reverend T. F. Davies, Bishop of Western Massachusetts, on Sunday, October 21; and the Reverend Doctor Frank Gavin, Professor of Ecclesiastical History at the General Theological Seminary the following Sunday, October 28th.

Dr. Gavin's sermon was an attempt to establish a synthesis between two antagonistic types in the Church, the radical and the conservative; and in doing this he brought forth many striking and paradoxical statements, well worth remembering,—"Faith is not a gem but a germ;" "the truest conservative is the truest radical;" "faithfulness to conserve means progress;" "faith is a principal of life and not an heirloom;" "revelation is not an act but a process."

VARSITY OVER- WHELMS WORCESTER

(Continued from page 1)

forced to punt again. The Varsity carried the ball well into Worcester's territory, only to lose it on downs. Worcester punted, the kick going off-side at their thirty-five yard line. The Varsity managed to reach Worcester's one yard line this time, where it lost the ball just as the whistle blew for the end of the half. Score at the end of the second quarter: St. Stephen's 6. Worcester 0.

Third Period.

Simmonds opened the second half by kicking to Moran who was downed on his twentyfive yard line. Worcester punted, and after runs by Kilby, Patterson, and Simmonds had put the ball on Worcester's fifteen yard line, Deloria tossed a pass over the goal line to Noble for the second touchdown. Simmonds place-kicked for the extra point. Worcester chose to receive, Simmonds kicking off. Wilson smeared an attempted lateral pass by throwing the runner for a loss. Simmonds ran back Vaughn's punt ten yards before he was downed. The Varsity's second march down the field again culminated in a pass to Noble for a touchdown. The try for point failed. Worcester's kick-off went to Deloria, who returned it fifteen yards. The period ended with St. Stephen's holding the ball on its own forty yard line. Score at the end of the third quarter: St. Stephen's 19. Worcester 0.

Fourth Period.

The Varsity failed to gain, and White punted. The ends were down fast, and dropped the Worcester back in his tracks. Murry ran back Worcester's return kick fifteen yards. Again the Varsity punted. A Worcester back fumbled the catch, and Gruver, down under the kick as fast as the ends, scooped up the loose ball and shaking off two tacklers who tried to stop him, ran thirty-five yards for a touchdown. The try for point failed. Simmond's kick-off was a trifle short, and Worcester ran the ball back to its forty yard line, where they were forced to punt. Line plunges and off tackle plays by Deloria and Voorhees brought the ball to Worcester's thirty yard line. Here a long pass over the goal line from Deloria to White scored the last touchdown of the game. Deloria made the extra point by a drop kick. Shortly after Simmonds' kick-off the game ended. Final score: St. Stephen's 32. Worcester 0.

Throughout the game the work of the Varsity line men was outstanding. On the defensive they broke thru time after time to throw the Worcester backs for losses, while on the offensive they ripped holes in the Worcester line at will.

The line-up:

St. Stephen's	Worcester
Wilson	L. E. Secino
Jones	L. T. Wilsox
Judd	L. G. Martin
Moser	C. Cooper
Coffin	R. G. H. Hansen

Smith R. T. Sanborn
Noble R. E. Scott (Capt.)
Simmonds Q. B. Vaughn
Kilby R. H. B. Moran
White (Capt.).. L. H. B. Calder
Deloria F. B. Bodwell

Score by periods:

St. Stephen's	6	0	13	13—32
Worcester	0	0	0	0—0
Touchdowns: Deloria, Noble (2), Gruver, White. Points after touchdown: Simmonds, Deloria. Substitutions:—St. Stephen's: Gruver for Moser; Murry for Simmonds; Patterson for White; Moser for Gruver; Simmonds for Murry; Voorhees for Kilby; Gruver for Moser; White for Patterson; Murry for Simmonds; Harrison for Jones; Wade for Coffin. Worcester: Wendlin for Sanborn; O. Hansen for H. Hansen; Carlson for Martin; Johnson for Vaughn; Bassilatis for Moran. Referee—Esper, Springfield. Umpire—Larkin, Holy Cross. Linesman Greene, Harvard. Time, two fifteen and two twelve-minute periods.				

Junior Promenade On November 16

The Junior Prom. will be held in the gymnasium on the evening of November 16. Tite, chairman of the dance committee, has engaged Carl Mayes' New England Orchestra, famous for its seductive strains and sobbing saxophones. The invitations are out, and programs will be on the market by the time we come from press. Tite expresses the usual hope that a number of the younger alumni, and such of the older ones as may have preserved or bought their spirit, will plan to attend. If written notice be given the committee in advance, the labors and losses of the refreshment department will be alleviated.

Alumni Notes

Death of Rev. Charles Bloor, '93

The Living Church of October 20, reports the death of the Rev. Charles H. Bloor, rector of All Saints, South Jacksonville, Florida, on September 22, at his home in South Jacksonville.

He was a special course man at St. Stephen's, of the class of 1893. From here he went to Nashotah House, where he was graduated in 1896, and ordained deacon and priest by Bishop Nicholson in the same year. During his twenty-six years of service to the Church he served as a missionary in various fields, among them Alaska and the Hawaiian Islands.
