ST. STEPHEN'S COLLEGE

THE MESSENGER PROOF SHEET

ST. STEPHEN'S
AT STUDENT
LIBERAL MEETING

The 70th of the National Student Forum conference, held at Yonkers, April 26-29, at which St. Stephen's was represented by Labaire, 24, was planned to meet the doubts and perplexities of thoughtful students who are charting under the impersonality and stiffness which marks many of our colleges and universities. Most of the points discussed were relevant to large institutions, and had no bearing upon problems such as confront the student body at this campus, but it was of advantage to St. Stephenson's be represented, if only to help us form several comparative judgments.

On Saturday afternoon President Alexander Melikohn of Amherst addressed the delegates, and, in substance, warned them not to feel too much over mechanical curricular rejections, but rather to bear in mind the precept of Epicurus, to the effect that he who has true knowledge will be free in any situation. Discussions and questions followed, but left far behind.

In the evening Dr. James Harvey Robinson, author of "Mind in the Making," was the speaker. He took his departure from the need, in college training, of intellectual honesty, and proceeded cheerfully to tear down any and every educational standard now extant. Instead, he offered the principle of complete intellectual skepticism, upon a basis of cynicism. He appeared to favor the abandonment of present educational machinery, and the substitution in its place of the motto, "For me there is no value in studying any subject which bores me, and I shall throw over any such subject." Discussion and questions followed, this time all directly to the point, since all points had been abolished except the determination to abolish all points.

Sunday morning, despite the fact that the very clocks had leaped ahead to keep in the spirit of the meeting, the student delegates met sharply at nine, with Mr. Jasper King of Union Theological Seminary in the Chair. Reports were made by local forum leaders, curricular committees, and the editors of liberal sheets. Discussion then centered about one of the statements Dr. Melikohn had made on the previous day, to the effect that real education is impossible in America because a live faculty and an intelligent student body can never conceivably be installed simultaneously in any given institution. While this

PROPOSED CURRICULAR REFORMS

Last week President Bell attended the meeting of the Association of Church College Executives, at Geneva, New York. Those present were: President Peirce, of Kenyon College; President Ogilby, of Trinity College; President Bartlett, of Hobart; President Bell; and Bishop Brinton, Chancellor of Hobart. The meeting was held for the purpose of discussing administrative and educational problems common to all of the colleges above mentioned. But few of the decisions made have been given out for publication; apparently most of the deliberations were held in secret.

The course in religion, which St. Stephen's has adopted, and which is to be inaugurated next year, in which the professors of philosophy, science and sociology combine with the chaplain to discuss fundamental problems of religion, instead of the material used in the old fashioned Bible classes, was also commended by the other colleges, and was warmly endorsed by Bishop Brinton. The St. Stephen's scheme for freshman science, which admires the liberal arts by those who have special facility for scientific work, and substitutes, for the rest of the men, a lecture course in the history and principles of science, aroused much enthusiasm.

According to President Bell, the Executives were much concerned

Baseball Team Breaks Even With Norwich

NOSED OUT BY ONE RUN IN FIRST GAME, MAKES CLEAN SWEET AT NORTHFIELD—BOTH GAMES FEATURED BY HARD HITTING.

In a game replete with brilliance, plays on the part of the men of both teams, the Norwich nine nosed out the Crimson team by a single run. Captain Craig was the outstanding star of the game, accepting many difficult chances at short stop without a slip of a fumble, while Noble at first did his work in a thoroughly businesslike manner. White's three bomber would easily have been a homer on a faster field. For the visitors, Rosenthal, Clark and Bradley played excellent ball, the first named making several good catches of flies which came in his territory. Kilby, pitching his first game of college ball, made a very creditable showing and, aided by the decided improvement of his team-mates, allowed only seven hits in the game. St. Stephen's players gathered nine of the same from the offerings of the three opposing throwers.

SECOND NORWICH GAME

In taking the Norwich team into camp by a score of 5 to 1 the Crimson player accomplished a feat worthy of much commendation. Styles, the opposing pitcher was nicked for ten hits while Stickel, who took the mound for St. Stephen's, allowed the soldiers a scattered seven. It is well to note that Styles had previously beaten the Lowell Textile aggregation which in turn had held Holy Cross a 10 to 5-5 tie.

Osborne started the fireworks in the second inning with a perfectly placed bunt but seemed to out the Norwich infielders entirely at sea. He was followed by Lyte, who adopted the same tactics with identical results. Both scored when Bradley failed to hold the ball on Styles per to first. From then until the last half of the sixth the game was hard fought by both teams, Norwich try

THE STILL-BORN RENAISSANCE

We have just attended the Spring Symposium held under the auspices of the Student Forum, to discuss the possibility of a "student renaissance" among the undergraduates of American colleges and universities. We bring back with us impressions in which are mingled strands of moral earnestness, poor digestion, indoctrination, political ambition, righteous indignation in the face of administered incompetence, and sheer laziness—but the greatest of these is laziness.

The problems discussed centered chiefly about such matters as curricular reforms emanating from the students, free speech in academic publications, and the possibilities of arousing undergraduate interest in matters of social importance. We thank our God that we are not as other men, even at the risk of seeming Pharisaical. We went to the meeting thinking that probably we were a radical. We found that we were a conservative, but for that very reason more radical than most of the others there. This statement applies not to us alone, but to St. Stephen's men as a body, and merits fuller exposition, lest it seem a paradox.

"Liberal, liberal, liberal," thus ran the refrain of every student utterance: but the applause was actually not so much for mental freedom as for mental laxness. "Down with the old studies which cramp our style, that we may keep our complacency as we have it. Let the faculty give us a series of cultural pepoleea, that he who runs may feast without the trouble of eating. What we dread most is the boredom which we feel as a result of required work which makes us delve to the root of knowledge for ourselves." Cause to be every student become a flock of sheep, and that will be freedom! The paradox is gone, and we can sit back and lick our lips. Be it said, in defence of the majority of the delegates, that they showed much earnestness and sized many real grievances: but it is also said that earnestness and the airing of grievances can never be ends in themselves. St. Stephen's men, searching for the roots of learning with their instructors as councilors and friends, are more radical in their convictions than any that can dare to be who yet accord their mechanical boundaries the worship of hatred.

LAMBS TO THE SLAUGHTER

Every once in a while St. Stephen's sends out to some high school or preparatory school a second team, the back-bone of which has been withdrawn to stiffen the varsity bunch. The scrubs do their best, but that best is hampered by many physical and psychological complexities. During the football season the second team played, away from the college, the high schools and prep boys. Will the baseball season he allowed to reproduce the performances of last fall? As long as we send from the college teams not representative of the best athletes we have, we can entertain few hopes of inducing able athletes from high schools and preparatory schools to register here. It is not fair to the athletic future of St. Stephen's that the student body should be forced to accept such representation; it is not fair to the victors of yesterday; it is not fair to the vigor of the young man in attempting to establish a record for the college; above all, it is not fair to the morale of the students who comprise the second team in any way.

PROPOSED CURRICULAR REFORMS

(Continued from page 1)

with the lack of facilities in our theological seminaries for men who wish to take Orders, and at the same time to engage in scholarly pursuits. All of the colleges reported difficulty in pursuing such men to enter any of our existing seminaries; those which do are fairly well suited for training ordinary pastors, but in which neither the standards nor the prestige of the course can possibly be termed anything else but undergraduate. A memorandum about this subject, for publication, was unanimously adopted.

The next meeting of the Association will be held at Kenyon College, next October.

Water at Last!

Another Cause of Inconvenience Removed

For the past three years one of the chiefest inconveniences about campus has been the lack of an adequate water supply. Due to the rock formation underlying the College, was always provided sufficient water to drill for water, though many attempts have been made. But last week Mr. A. Hatfield, Jr., of the Board of Trustees, accompanied by engineers and contractors, visited the campus; plans were completed for a new water supply, which will be ready in the autumn. There is nothing new in the news purchased by the college last fall, which yields from eight to twenty gallons of excellent water every minute. This will be supplemented by a number of deep wells in the vicinity of the spring. A thousand gallon concrete reservoir will be installed, and the water pumped to the college under pressure. The unsightly water tanks which now disfigure the campus will be removed. It is expected that this supply of water will be sufficient for the needs of two hundred persons, and the old wells will be kept clear for supplies in emergency. The money for this improvement has been contributed by several members of the Board of Trustees, under the leadership of Mr. Hatfield.

Faculty Votes Insignia To Dragon Club Members

At a recent meeting of the faculty it was decided to confer upon the members of the Dragon Club permission to wear a distinctive insignia upon the lapel of the gowm as a badge of honor. This badge is of green braided in the colors of the Green's Letter Delta, and its use is restricted to Dragon Club members only. The adoption of the insignia came as the result of a suggestion made by President Bell at a meeting of the Dragon Club held in February.

Gifford Elected To Dragon Club

At the last regular meeting of the Dragon Club, Gifford, '24 was elected as a member, in recognition of his high scholastic standing, and his participation in extra-curricular activities that further the interests of the College. Gifford's averages for the past three semesters have been 83.4, 83.6 and 83.4, respectively.

Eulexian Society
To Hold Dance

On Friday evening, May the eleventh, the Eulexian Society will give its triennial dance. This year it is to be held at the Tennis Club, Poughkeepsie. Invitations have been extended to some seventy students, faculty members, and alumni. The trip from the college to Poughkeepsie will be made in automobiles, arrangements having been made for return the same night. The dance is to be seen and enjoyed by a large audience. Poughkeepsie has been engaged to furnish the music. The list of patrons, and chairs, includes members of the faculty and their wives, together with several of the alumni and their wives. Many of the non-resident guests and alumni expect to return for a visit to the college, and will be lodged on campus, and in the village and neighborhood. Several of the faculty have offered housing accommodations. Every indication points to a pleasurable weekend.

Faculty Member is
Director of Successful
Boy’s Camp

Camp Kokosing, the summer camp of which Mr. Cook, our professor of mathematics, is director, is looking forward to its most successful season. Already many registrations have been received from all parts of the country.

This camp is situated in the town of Stanwood, Orange County, Vermont, approximately midway between the Green and White Mountains, a portion of the country famed for its marvelous scenic beauty and its invigorating summer climate. The camp site comprises four hundred acres of woodland and open fields, at a height of 1500 feet above sea level on the border of beautiful Lake Kokosing. It is an ideal camp for boys, where they revel in the real woods under the personal supervision of leaders of fine ideals and mature character; where everything in athletics, acquirets and outdoor life is taught; and where every effort is made to develop initiative, and bring out to the fullest expression the natural good qualities which every boy possesses.

It has always been Mr. Cook’s policy to engage as many St. Stephen’s men as possible to be counselors; John C. W. Linsey has already been chosen for the coming summer.

K. G. X. ENTERTAINS

On the evening of Friday, April 27th, Kappa Gamma Chi was host to Chaplain and Mrs. Smith of Barrytown. Following a delicious dinner at the college church, from the campus,—Dr. Wilson, Mrs. McDonald, Miss Hensall, Miss Littell Davey and Engelliek, Music and dancing furnished the entertainment for the evening. At ten o’clock refreshments were served, and the affair was pleasantly concluded at half past eleven.

Alumni Notes

Out of the five men chosen last week for the cabinet of the Missionary Society at the General Theological Seminary, the only organization at the Seminary which represents the entire student body of over one hundred men, there were St. Stephen’s, as follows: Edmund Wood, Vice President; Donon Strong, Recording Secretary, and Frederick Harry, Treasurer. St. Stephen’s is further honored at the Virginia Seminary, where Herbert Dunavan is president of the Missionary Society at that institution.

The engagement has recently been announced of Miss Claire Aled Schenck to Mr. Gordon Lee Kidd, St. Stephen’s, ‘21.

The Rev. P. W. Mosher, St. Stephen’s, S1, of Niagara Falls, received his D. D. in course from Trinity College, University of Toronto, on April 26. Dr. Mosher received his M. A. from this college in 1888.

Saint Stephen’s College
Annandale-on-Hudson
New York

May 1, 1923.

To the Alumni of St. Stephen’s:

The Athletic Association is hard pressed for funds to complete the present baseball season, and are asking your assistance. We need five hundred dollars to clear up our debts and cover necessary expenses.

You know the record of the football team. The basketball team won three-fourths of its contests. The baseball team won a glorious victory over Norwich University on last Friday. We hope to take Trinity into camp the 4th. We have excellent prospects for the remainder of the season. But we must have funds in order to complete our program.

Checks may be sent to Mr. Norman Howell or myself. Help the St. Stephen’s team to round out a great athletic year.

Sincerely yours,

(Signed) Percy S. Prince
Director of Athletics.

The President’s Engagements

During the past few weeks the president has been much away from the campus. The Sunday after Easter he preached in the Princeton College Chapel, and held personal religious conference with many undergraduates. The following Sunday he preached at Hobart College, and delivered public lectures on the three following days. Last Sunday he was at St. Paul’s Cathedral, Buffalo. Next Sunday he will preach at Hotchkiss School.

ning time and again to gain the lead, but being consistently prevented in its attempts by the brilliant playing of the Crimson infield. In that frame Deloria contributed a long two bagger which resulted ultimately in three more runs for St. Stephen’s. Norwich’s only tally came as the result of a long center-field fly to Deloria, on which Connolly touched off and came in. Stielke, although he passed nine, kept the bases fairly clear and forced Norwicher’s to be satisfied with scattered hits. The promiscuous base stealing of which we have read so much in regard to other New York State teams, was in this game conspicuous by its absence, each side gaining but two sacks by that method. Craig played his usual good game at short, while Osborne’s fielding is deserving of very favorable mention. Bouton was the winning star of the game, knocking out three singles in four triples to the plate.

“RAIN”

The weather bureau of Vermont provided an excellent day for the contest, which was very gratefully received by the invader from the land of snow and ice. They had been so busy looking over the environs as described in Major’s “Blue Book of the United States” that they had become quite oblivious to weather conditions. The whole trouble lay in the fact that some malevolent tug on the campus had placed the pages together in several instances, and the team was taken along Long Trails when it should have been riding on marble highways.

The trip through the National Life Building in Montpelier, and the dinner which Rev. W. J. Knapp ’88 set the team up to were greatly appreciated by all “those present.” A few more alumni like him and the A. A. would never need to worry about funds. As one looks back, they were the only bright spots in the darkness of the cancelled St. Michael’s game.

The Tennis Prize

For the past three years it has been the custom to give to the winner in the singles of the annual spring tennis tournament a racquet of some value. This year and next the procedure will be altered. Mr. A. Hal- feld, Jr., of New Canaan, Connecticut, has offered a cup to the victor. There are two “legs” to the trophy, not to imply that it will not be able to stand upright, but that it must be won by the same man for two successive years before he may keep it permanently in his possession.
