How is a Wireless Message Received?

EVERY incandescent lamp has a filament. Mount a metal plate on a wire in the lamp near the filament. A current leaps the space between the filament and the plate when the filament glows.

Edison first observed this phenomenon in 1883. Hence it was called the "Edison effect."

Scientists long studied the "effect" but they could not explain it satisfactorily. Now, after years of experimenting with Crookes tubes, X-ray tubes and radium, it is known that the current that leaps across a stream of "electrons"—exceedingly minute particles negatively charged with electricity.

These electrons play an important part in wireless communication. When a wire grid is interposed between the filament and the plate and charged positively, the plate is aided in drawing electrons across; but when the grid is charged negatively it drives back the electrons. A very small charge applied to the grid, as small as that received from a feeble wireless wave, is enough to vary the electron stream.

So the grid in the tube enables a faint wireless impulse to control the very much greater amount of energy in the flow of electrons, and so radio signals too weak to be perceived by other means become perceptible by the effects that they produce. Just as the movement of a throttle controls a great locomotive in motion, so a wireless wave, by means of the grid, affects the powerful electron stream.

All this followed from studying the mysterious "Edison effect"—a purely scientific discovery.

No one can foresee what results will follow from research in pure science. Sooner or later the world must benefit practically from the discovery of new facts.

For this reason the Research Laboratories of the General Electric Company are concerned as much with investigations in pure science as they are with the improvement of industrial processes and products. They, too, have studied the "Edison effect" scientifically. The result has been a new form of electron tube, known as the "pilotron", a type of X-ray tube free from the vagaries of the old tube; and the "conotron", which is called by electrical engineers a "rectifier" because it has the property of changing an alternating into a direct current.

All these improvements followed because the Research Laboratories try to discover the "how" of things. Pure science always justifies itself.

New Professor in Physics and Instructor in Mathematics

Professor Henzell to Come Into Residence Next Fall

A VERY happy addition to the college will be made next autumn, when Professor Archie Willoughby Henzell takes up his residence here as head of the Department of Physics. Prof. Henzell received most of his education in England, and has done most of his previous teaching in China. He received his diploma in chemistry from the University College, Liverpool. After five years' teaching in England, he became professor of science at Shantung Provincial College—a government institution. After several years in this position he left China for America with the idea of becoming a priest and then returning to China.

At the outbreak of the war, however, he entered the Canadian Army, where he held a prominent position in the department of explosives and chemistry. A breakdown in his health brought about his discharge, and he became physical director in the Philadelphia Navy Yard for the last two years of the war.

At the close of the war he became instructor of mathematics in the Oklahoma State School of Mines, from which institution he received his M.Sc. degree. This year, while seeking a position in an eastern college, he holds the chair of Mathematics in the Pennsylvania Military College.

He is a Fellow of the Chemical Society of London, and a member of the American Institute of Mining and Metallurgical Engineering. He wrote "Introduction to Mineralogy," published by Macmillan in London in 1912.

In the basement of Ludlow Hall, an adequate Physics laboratory will be prepared during the summer under Professor Henzell's direct supervision. This laboratory will be somewhat like the Biology laboratory renovated during the summer of 1920. With the addition of Professor Henzell the Faculty will be able to offer all subjects in the new scientific curriculum.

New Building for Campus

Trustees Consider Plans for New Faculty Dormitory

IT is rumored that the Trustees have proposed preliminary sketches for the erection of a new dormitory during the summer to be occupied by eight unmarried members of the faculty, thus relieving the present dormitories to accommodate sixteen new men.

The new sketches of the buildings, we are told, consist of suites of three rooms, and between each two suites is a bath-room and kitchenette. Further details we are not in possession of at this time, but a full announcement may be looked for in the next issue of this paper.

The Administrative Committee have ordered a topographical survey of the entire campus showing elevations and rock formations, etc., for the use of the architects in planning for the next ten years.
Music in College
(The following article, written by Professor Fowler, is reprinted from the "Diapason"): A RE college students interested in music, and particularly in choir or church music? One college, at least, has proved that they are. At St. Stephen's, Annandale, N. Y., there is a choir of twenty-four men, with a waiting list that leads the singing of the daily chapel services and takes great interest in its work. A shortened form of the evening prayer is sung every day, the Psalms being chanted to the Gregorian tones.

Besides providing the music in the college chapel, the choir travels from time to time to other churches for the purpose of exemplifying the best standards of choral music. Last year, for instance, in Lent the choir sang at the Holy Cross Church, Kingston, N. Y., chanting the Psalms to the Gregorian tones, and the Magnificat to one of the elaborate tones; also singing Gounod's "Gaillard," which had been arranged for men's voices. In Hyde Park on Ascension Day (a club concert having been given the preceding evening) the choir sang the plain-song "Missa de Angelis" entone. Just before the Easter holidays this year the students had a carol service, following a custom begun three or four years ago, and some of them wrote their own carols. The carols were beautifully sung.

Perhaps the most important service the choir has rendered—that not the most conspicuous—is the reading of the New Hymnal. Many of the finest of the new hymns have been found out and learned. From time to time others have been added, in the form of a choral version of a well-known song in its stately tones; a plain-song hymn, perhaps, or a bit of French from the "Mess" mass; a beautiful melody set to "Let All Mortal Flesh Keep Silence"; or again, an English favorite like "The Day Thou Gavest, Lord, Is Ended." There is a real thrill when Tertius Noble's setting of "Fierce Was the Wild Billow" is sung. These and many others become, through frequent use, part of the spiritual equipment of many a young man who has since become a choir member.

Chapel Notes

Among the Lenten preachers in the college chapel during Lent, have been the following: The Reverend Samuel Shoemaker, Rev. J. Barry, D.D., of the Church of St. Mary the Virgin, New York City; the Reverend Hugh L. Burleson, D.D., Bishop of South Dakota.

The Right Reverend Hugh Burleson, D.D., Bishop of South Dakota, was with the Sacrament of Confirmation and preached the sermon on Sunday morning, March 6th, at the Hugh Mass.

Member of Board of Trustees Receives Doctor's Degree at Washington

The degree of Doctor of Humane Letters was conferred upon Alison B. Houghton, a member of the Board of Trustees, by George Washington University in Washington, D. C., on the occasion of their 100th Anniversary. Dr. Houghton represented St. Stephen's officially at the jubilee. The degree was conferred because of Dr. Houghton's service to learning during his entire business career—a service which began when he helped Vincent Byrne write "The American Commonwealth." Dr. Houghton is said to have large critical knowledge as any man in America of the writings of Karl Marx. He is at present a member of Congress and a prominent Republican from the northern part of New York State.

Alumni Notes

Death of Tillotson '74, Soon Followed by Devall's Passing

The Reverend Cyrus O. Tillotson passed away at his home at Seabright, Santa Cruz, California, in January. His death marked the end of a very successful and remarkable career, though perhaps a quiet one. He was greatly loved by those around him, and this college can rightly boast of such an alumnus.

Mr. Tillotson was graduated from this college with the Class of '74, and received his theological education at Cambridge Theological School. He was a member of the Eastern Society. From Cambridge he went to San Francisco, where he was ordained deacon and priest in '77. He spent some time at Santa Clara and also at Cheyenne, Wyo., where he spent three years at Butte, Mont. He was rector of Calvary Church, Santa Cruz, for twenty-five years. He is survived by his widow and his two daughters.

The Very Reverend Frederick DuMouster Devall died suddenly from a stroke of apoplexy on Tuesday, February 8th, at Memphis, Tenn. Dean Devall received at St. Stephen's College, Bishop of South Dakota, with the class of '96, after which he went to the General Theological Seminary. He was ordained deacon and priest in the following year.

He was assistant at Trinity Church, New Orleans; rector of St. Luke's, Memphis; St. Avelyn's, Chicago, Illinois; Montgomery, Alabama; and Dean of St. Mary's Cathedral since 1914. Dean Devall was also president of the Standing Committee and held many other important positions in the diocese. He was very popular among his congregations, and was exceedingly loyal in the discharge of his duties.

The Reverend Gilbert R. Underhill, rector of St. Mark's Church, Hammondsport, New York, was reelected. He will remain in Hammondsport for the present.

The Reverend Ralph E. Shults accepted the call to the rectorship of Christ Church, Westfield, Ohio, and began his duties there on March 1st.

As a result of a preliminary meeting held in October, a meeting of the Up-State Alumni of St. Stephen's College, for the purpose of forming a definite organization, was held at the University Club in Syracuse, on January 24th.

The following officers were elected: President, the Rev. C. S. Champlin; First Vice-President, the Rt. Rev. Charles Fiske, D.D.; Second Vice-President, the Rev. J. T. Rose; Third Vice-President, the Rev. A. McMillin; Secretary and Treasurer, the Rev. J. A. Springstead.

President Bell's Program During Lent

President Bell has spent the greater part of the Lenten season away from the campus. Among the most important of his engagements as for February have been the following: A mission at Christ Church, Baltimore, and preaching at the Gilmore School; February 25th, at Holy Roost Church, New York City; beginning on February 21st, a week's Mission at the Carrick Theatre, Philadelphia; during this week he also attended a luncheon of St. Stephen's Alumna in Philadelphia; he preached before the B. S. A. in Philadelphia; he preached at St. Paul's Church, Hoboken, and before the B. S. A. in Garden City.

On Sunday morning, February 27th, he was the preacher at the Church of the Transfiguration, New York City, and on that evening at St. John's Missionary Church, North End, N. J. He was in charge of the mid-day services at Trinity Church, New York City, during the week evening February 28th. On March 2nd he preached at the Chapel of the Incarnation.

On March 6th he was at St. Margaret's Covenant, Boston, after which he conducted a week's Mission at St. Stephen's Church, Lynn. He also preached, during this week, at St. Paul's Cathedral, Boston; before the Massachusetts Clerical Association, and before the B. S. A., Garden City.

During the latter part of Lent he preached at Zion Church, Wappingers Falls; at Grace Church, Elmira; at Corinthian Church; at Christ Church, Tarrytown, and at Ascension Church, Mount Vernon, N. Y. On Easter Sunday he will preach at Williams College, Williamstown, Mass.

THERE is present in the vast majority of American people today a firm conviction that the only way to get along in this world and to gain happiness is to offer one’s wares with an almost consciousless zeal, with no apparent desire to adhere to the simple principles of truth. To use a highly jargon, but very expressive, bit of college parlance, one must “shoot a mean line” if he is to accomplish anything or arrive at any desirable point in the journey of life—at least so we are told. One has only to look around him and, it may be, with him, to perceive countless examples of this predominant American trait. It has become so commonplace that one rarely, if ever, stops to reflect on the insidious forces of which it is indicative.

It is with a distinct feeling of revulsion that many of us see an exotrophy of this modern philosophy held up for our admiration. We see youths of apparent uprightness carried away by something akin to admiration for the type of man who has a clever “pitch”, a good tongue, and a suave manner, can so bewitch those around him that whatever he wants he gets. He is pointed out as a “success,” and his youthful admirers are filled with a fervent desire to emulate in their lives those characteristics of that kind which will bring to them a measure of that same “success.”

One wonders if it has never occurred to these men that the present parts of this new philosophy are duplicity, falsehood and hypocrisy, those qualities which even the most lax of us despise. Do they realize that the evil fruits of such a school of thought are a diminution of self-respect, a final disappearance of respect from others, and a contempt for others who are so gullible and rabbit-brained? In spite of these ultimate fruits, one may attain a certain superficial success, but he will never attain happiness. Is the “success” worth the price?

Those who believe in the “line-shooting” philosophy argue in its defense that “one must put one’s best foot forward”, “one must blow his own horn”, to a certain extent at least, or he will be swept away. They say that one must have self-confidence and self-assurance in goodly portions. Yet the same mind will agree with Mr. Chesterton on his statement that “the men who really believe in themselves are all lunatic syphils.”

Men here at St. Stephen’s are not free from this taint. The man who can “get by” with the minimum amount of work, the man who can consistently and deliberately “fox the faculty” is generally reckoned as clever and worthy of emulation. St. Stephen’s is said, among other things, to stand for “blunt sincerity.” Whether it does or not is a matter of question, but it undoubtedly should stand for that. It is up to us to see to it that it does.

Let us turn our attention away from the stultifying habit of “shooting a mean line” in serious matters, and let us allow a wholesome sincerity, not necessarily blunt, to enter into our lives.

IT is quite evident that the present-day attitude is one of discontent. Modernism would have us seek the everything that pertains to the past, regardless of its worth. It would have us build anew. In fact, it looks upon practically all of the foundations laid by our predecessors as unstable and detrimental to progress.

In many cases such a view is justified. But can it be so generalized? Are there not many of our old traditions and customs that are worth while? It seems to us that many of our unsolved laws are essential foundations upon which to build. From them we can branch out to the attainments of higher society. But we cannot ignore them. They are a part of us.

They represent our feelings and, to a large extent, mold our thoughts. The ideas of individuals are necessarily complex, but customs and traditions are the inevitable outcome of group agreement.

St. Stephen’s College has many customs and traditions. They are vital forces in the history of our Alma Mater. In all phases of the College life we feel the indelible impress of the men who have gone before us—the men who have made or sustained our time-honored traditions. It is difficult to imagine what our life on the campus would be if not for many of the unwritten laws which we hold so dear. It may be said that we could get along without them. But, is not the same true of practically everything else in life? We could get along without them, but, oh, how they would be missed. It is these traditions that color our life, our thought, our actions. They are the common bond which binds the alumni and undergraduates in one large family. Without them the hollowed halls of Alma Mater would be bare. It is around them that our life centers, just as it has for all who have gone before us.

Conditions on the campus to-day are apt to blind us to the vital influence and importance of our traditions. But it is our firm belief that we must remain steadfast in our duty to uphold those aims and ideals of our Alma Mater so nobly set forth in the traditions. As this year draws to a close many who have endeavored to maintain our customs will leave these halls. Then, the work of others will fall upon you—undergraduates. What is your attitude going to be? The future of St. Stephen’s depends entirely upon you. She asks that you, as loyal sons, eagerly carry on further all that she has fought for from her very birth. Your attitude must be one of self-sacrifice. Let it be, “What can I give my Alma Mater? How can I best serve her?” She is lenient and hopeful. All that she expects is the young men’s most earnest effort in maintaining her achievements, her traditions, her aims and ideals.

ENGAGEMENT

Mr. and Mrs. William S. Macdonald have announced the engagement of their daughter Edith, to the Reverend Henry Glasier, ’14, of St. Paul’s Parish, Flatbush, New York.

Music

CONTINUING a custom originating last year, the Rev. Cuthbert Fowler has been giving a series of half-hours of organ music in the college chapel. The music has been supplied by Mr. C. Miller, organist of the Greek Church, the numbers being for the most part from standard composers.

The results have been rather encouraging. It has been the opinion of some of us for a long time that St. Stephen’s was lacking in its cultural education. We have for years been offering courses designed to stimulate young men’s interest in the higher things of life. It seemed that literature had become mere classroom work, and that interest in all art and culture was non-existent, despite our formal instruction.

Of late there seems to be a decided improvement, and herein lies the hope of St. Stephen’s, rather than in so many dollars contributed by mildly interested people of means. The voluntary work in poetry and literature of this year is decidedly encouraging, especially since it came from the students themselves. Dramatic art is becoming a chief topic of conversation, and, this interest, we understand, will soon bear fruit.

The attendance at these organ recitals is another sign of a spiritual remission. It is one which we hope will thrive and grow. In this way we can show people that the American undergraduate, especially the St. Stephen’s man, is a person on whom it is decidedly worth while spending money. To those looking these popular half hours of music, we heartily recommend that they lose no time in availing themselves of this opportunity, as well as the good work along other cultural lines, not prescribed by the authorities. Don’t get behind.

The choir brought out a new musical setting this year to “The Story of the Cross”—a Friday evening chapel tradition in Lent. As a musical composition it is much better than the one which has been used for some years. As for the rendering, well, Mr. Fowler said that it proved that every man of the choir is cendidly behind the director. When pressed for an explanation, he said that his statement certainly could be taken as a compliment.

C. F.

Don’t Grouch
Smash a window or a chair or take a cold plunge—anything to get it over with.
ATHLETICS

VARITY SHOWING UP VERY WELL

INTERCLASS BASKETBALL GREAT SUCCESS

CANDIDATES for the basketball team were called out early in January, but real practice was not attempted until after the mid-year exams. As the college had no team last year, it was necessary to build an entirely new team from the material on hand, and after a month of hard work a very creditable aggregation was the result of the white and orange of St. Stephen's. Colwell '21, a guard, is the captain and leader of the 1921 team. The forwards were White '24, Willmuth '24, Richy, 24, and Richy (A.). Coffin '24 holds the position of centre, and Stewart '24, Boulton '24, and Wellford '23, work as guards with the team. The schedule of the team has necessarily been hampered by low finances, but two games have been played to date. On Feb. 12th, the fast Rhinebeck Men's Club team was defeated in the new Memorial Gym, by a score of 27 to 17. On Feb. 19th the team journeyed to Albany and were defeated by the veteran team of the Albany State College by a score of 31 to 15. A return match will be played with the Albany team in the Memorial Gym, on March 19, and the Varsity hopes to reverse the score. The encouraging feature of the season is the fact that but one man will be lost by graduation, Colwell, and that a full team of Freshmen will be available for next year, together with the fast Freshman class team. An excellent team is assured for the season of 1921-22.

The Interclass League, inaugurated by Major Prince, Director of Athletics, in connection with the gymnastic work, has been a great success. Nearly everyone connected with the college witnessed the Freshman-Sophomore game, and the final Freshman-Unclassified game. A very exciting game, in which the Freshman clearly demonstrated their superiority over the Sophs by a score of 41 to 4 was the surprise of the schedule, and gave the Freshman the right to play an extra game with the Unclassified team for the championship. A hard-fought battle was staged, but the Freshmen proved too much for their opponents and emerged from the fray with the long end of a 31 to 15 score. The final league standing was, Freshmen, Unclassified, Juniors, Sophomores, and Seniors.

An Indoor Baseball League will furnish amusement for the gym. classes for the remainder of the season until the real ball tossers get into action. Candidates for the baseball team will be called out immediately after the return from the Easter vacation, and as several of the last year's team are available, a first-class team is anticipated.

Candidates for the bowling team of the college will contest with the Men's Club of the Rhinebeck in the near future, are practicing for the new alleys. Coffin '24, A. Richy '23, Cowling '23, Colwell '21, and Roche '22, are showing up well. Good records are also expected from Saunders '21, Craig '23, Simmons '23, Simmonds '24, and McCormack.

The Champion Freshman Class team was captured by Lewis, and included in the line-up Fitzgerald, forward; Andrews, centre; Brumig, guard; Shaw, guard, and Everett, guard.

The Unclassified team, runners-up for the championship, included Gifford and Wu, forwards; McCormack, centre, Edwards and Kaster, guards. Wu, a Chinese student, contributed quite decidedly to the success of his team.

On Thursday afternoon, February 17th, Hollis W. Colwell '21, was elected captain of the varsity basketball team.

To the Alumni

THE Athletic Association of St. Stephen's is in need of additional funds in order that the baseball team may be properly equipped. The past year has been a hard year for athletic finances. New equipment and suits had to be purchased for both football and basketball squads. The carrying out of schedules required funds, and the Athletic Association finds itself without funds to equip a baseball team. We need your help. After all every St. Stephen's team is YOUR team, and we want to give you an opportunity to aid in the support of the team. There are some whole-hearted fellows in the college who will get out and work hard to help keep the Crimson and White floating triumphantly over the fields of athletic endeavor, but they need YOUR help with the financial difficulties that beset the manager.

You want to see St. Stephen's win, don't you? Then help out your athletic association and your team with a contribution. Send your check or money to Mr. Gordon Kidd, Treasurer of the Athletic Association, St. Stephen's College, Annandale-on-Hudson, N. Y.

Let's all pull together for a successful baseball season in order that the old Crimson and White may wave victoriously, and enable you to say "That's the team from MY college."

All together! A long St. Stephen's, with team on the end! and don't forget to send in your check at once to Gordon Kidd.

Edmund B. Wood, '21,
President Athletic Association.

Your friend is the man who knows all about you and still likes you.—O. C.

One Exception

Prof.—"Nobody ever heard of a sentence without a predicate."

Light Soph.—"I have, prof."

Prof.—"What is it?"

Bright Soph.—"Thirty days."

Punch Bowl.

If you want to be continuously happy you must know when to be blind, when to be deaf, and when to be dumb.—O. C.
The best thing about spring is that it comes when it is most needed.

Perhaps after all the rumors about more rooms will mean more rooms for roomers!

It looks, after all, as though we were going to have a swimming pool in the Gym.

Andrei—"I'm going to kiss you every time you swear."

Her—"I'll be damned if you will."—Hamilton Life.

He (at house party)—"Let's go up into the cemetery."

She—"That's a grave question."

She—"Why do they paint the inside of the chicken coop?"

He—"To keep the chickens from picking the grass out of the wood."

—Hamilton Life.

Self-Explanatory

Recruiting Sergeant—"Why yer name and what branch of the service d'ye want to be in?"

Perkins (who stammers)—"Pep-p-e-p-pp-p-pp-p-pp-p-

R. S. (writing)—"Can't speak English and wants to join machine-gun outfit."

The Missing Blush.

He told the shy maid of his love,

The color left her cheeks;

But on the shoulder of his coat

It showed for several weeks.

—Scalper.
Dear Friends:

There is no way of spending one's spare time at St. Stephen's which can be more educative, and more fun, than to browse among the books in the library. The stacks are open to anyone. There is no meddlesome attendant ever seeking to make you "read the right things." You may dip here and there and occasionally light on something which to you is a treasure.

Into the library keeps pouring a goodly stream of current books,—the best of the new fiction, poetry, essays, histories, and scientific and sociological works. You may find joy in a late volume of Mr. Chesterton or Mr. Belloe, a new novel by Leonard Merrick or Zona Gale, some verse rich in beauty of Percy's or some other verse full of smoke and steel by Sandburg. Or among the not so immediate volumes you may discover Thomas Hardy—fortunate youth to have the chance to read as new revelations "Tess" or "Far From the Madding Crowd;" or Joseph Conrad; or Pendentifs; or "The Egoist."

Possibly you may come to see poetry as as beauty rather than as the bore it was in preparatory school. Only, if you try poetry, take it out, beyond "Silence" rulings, and read it aloud. Poems should always be read aloud. One must listen to them if one would understand them.

It may be that a browse to the magazines will help you, too. You can try out your French in "L'Illustration" and its supplements which contain all the best Parisian plays. There are British weeklies too. And this country furnishes the radical "Freeeman" and "Nation" to make you conservative and the conservative "Review" and "Outlook" to make you radical. There are sixty different periodicals on file.

And so on and so forth.

There are really more opportunities for good fun in the library than there are in the gymnasium—even with the new bowling alleys thrown in.

Cordially yours, with best wishes for a Happy Easter tide.
