Letters To The Editor

To the Editor: Piglination cannot be defended, nor can they forgiving for its existence unless it cannot be desired. Musters can or all be required. We cannot imagine the advantage that might be gained by their society, and so this matter, if handled, can be made to require the future of its existence.

The Gaffly

To the Editor: I wish to present the distinct purpose of "The Gaffly Papers." Done Brown and her contributions are distributed in a humorous and amusing manner, occasionally providing a small amount of light-hearted reading. There comes a time, however, when criticism must become constructive. If you are interested in criticism, it is quite difficult and even necessary for one to constructive suggestions.

I do not think that Miss Brown and her "backers" would state any productive suggestions. The very name of a paper requires their objections. Their objections are as simple as the answer: "This City" still sticks. Now, if we were in Ship, --, "

Douc, sound "omitted," Perish. But there are very few alternatives when the "power of oligarchy" has set themselves to rule, necessarily not only in the written word but in the rear of our American oligarchy on Monday night. They don't often speak up they're too busy now taking down prospective.

Safety Committee

Two changes have been made in the traffic regulations in the city. The first of major importance, and in the elimination of the faculty parking lot which is frequently used by students, has been the cause of major traffic problems. It was located in the Main Lot, farthest from Sottery Hall and adjacent to the traffic circle. The second, of wider significance, is the new Safety Committee ruling that traffic from the english parking area be channeled to the General Depot, but must be paid in. In a statement by Chairman Elizabeth, the explanation was as follows: "It has been decided that such a policy is not conducive to the maintenance of campus safety, for last semester an overwhelming majority of violations were simply charging "these fees." It has been agreed in Committee that a new system be offered a motor vehicle should be willing to accept the onus of responsibility and that, consequently, the car should be paid for by the student. The purpose is obvious, we wish to sharply reduce the small percentage of violations that drive or otherwise cause trouble to our community. Appeals are reviewed in the same manner in which they were handled last year, and meetings are held Tuesday night at 9:30 p.m.

Bernstein Speaks Of "Gold And The Dollar"

"Gold as good as the dollar, 2cbi, according to Peter J. Bernstein, New School Professor of economics, who spoke in March on American, 16th it's.

The United States dollar is the most desired currency in the world today. You can't get away with anything gold except with Russia, and even then it's too heavy. You can't buy a Soviet Union convertible in dollars. You don't even use them in your wallets. But there are still people who trade their gold for our gold, and consequently it's still one of the world's major currencies. It's what's happening there: that just can't enough gold is available. There's turning up in the world, the gold.

Bernstein, a member of the University, has been in the United States dollar in the debate on the future of the world. The United States dollar is the most desired currency in the world today. "I'm innocent. The Dean (President or Registrar) has been out to get me since I came here. He just doesn't like my beard and my long hair."

With minor variations this is the expected cry of the student who has been expelled. Unfortunately, a surprising number of times the student is believed and the morale of the school suffer. Students feel increasingly isolated from the "beings that govern" and come away with the feeling that the rules are arbitrary and unrelated to the realities of the world.

Under the appeal system that is being proposed a student would have the chance to prove his innocence or shut up. He would have a chance to have his case reviewed by a panel of faculty and/or faculty-students. If a mistake has been made, then it can be caught before it is too late. If a mistake was not made then the student body would at least have the feeling that each individual would have been judged in "just and fair" manner.

No one would be forced to bring his case to the appeal board. If the Dean had evidence that might originally implicate the student, the guy himself would be asked for a review by the appeal board.

All men, L.B.J. and the Dean:诛颅, are human. They all make mistakes sometimes. Maybe these mistakes are few and far between, but why risk having a student's career ruined by a mistake?

Every Review Board will make mistakes, but it just gives an accused student an extra margin of safety. It is harder to outlaw a whole board of a student's guilt than to convince one man.

Supreme Court Justice Black once said, "Better that ten guilty men go free, but more than that we don't want innocent persons to suffer wrongly."

"quoting of the week"

"The Giulio" is only one manifestation of this type of attitude. More than that, it is clear in the product of a close-minded and rigid imagination to which there is little room for growth, for mature judgment to be broad enough to encompass ideas and concepts. The growth of a child's mind is a marvelous thing to watch, the sifting of a mind to its essence, respecting, terrifying.

The Bard Liberal

by John A. Farrow

The Bard Liberal is quite easy to obtain. It comes out every two weeks, and is really a very nice current with a very small circulation. Unfortunately, the editor occasionally uses words that are not always appropriate for all audiences. In addition, the layout of the paper is sometimes a bit cramped, but this does not detract from the overall quality of the publication. The Bard Liberal is an excellent source of news and information on campus and is definitely worth checking out.

Improved Stamp Act!

In the name of John Dewey's "Progressive Education," Bard Development editors posed a number of questions regarding their experiences and opinions about the future of education. They agreed that developing a "New World" of education was essential, in that "pure" atmosphere of thought. In that "age of learning, science, and education," we must learn to think, read and write, and "rival and rival each other." In these terms, the editors believed that the future of a "New World" was possible and that Bard was to be St. Stephen's credit for having two different and very well-planned schools. Under men like Professor E. R. G. and Dr. D. S. H. who believed in the importance of the "New World," Bard Development editors felt that Bard should be a model in the arts of education, of higher learning, of culture, and, in general, of the future. This "New World" was "combined with" and "of absolute" and "the whole," and the editors were very much interested in the "New World" that they believed would be developed.
