

[ArchCare at Ferncliff Nursing Home and Rehabilitation Center](#) welcomes Bard students to volunteer in various departments. Volunteers play a vital role in supporting the well-being of residents, enabling staff to focus on providing essential care and services. Their time and dedication allow staff to enhance the quality of life for more individuals than they could on their own. Whether it's offering companionship, assisting with activities, or helping with daily tasks, volunteers are essential to maintaining the high standards of care that define the community. Interested students should complete the [Volunteer Interest Form](#)

The Thompson HOUSE

This newly renovated state-of-the-art rehabilitation center at ArchCare is dedicated to carry on the spirit, expertise, and quality of the historic Thompson House. ArchCare is proud to continue the expert quality short-term and post-acute rehabilitation that the Thompson House has brought to the Rhinebeck community in a relaxing atmosphere of support, compassion, and encouragement.

The best in state-of-the-art Memory Care. Welcome to the best the Hudson Valley has to offer for Dementia and Alzheimer's care. Our new Center for Advanced Memory Care, opened January of 2022, is the ideal mix of cutting-edge science and deep compassion. Beyond the state-of-the-art facilities, our Montessori approach makes all the difference in memory care, guiding our interactions by what your loved one needs and wants on that particular day. ArchCare's Center for Advanced Memory Care is proud to have reached Gold Credential status by the [Center for Applied Research in Dementia](#) for their Montessori styled approach.

Ground-breaking [Huntington's Disease Care](#). Since 2015, we've offered our renowned [Huntington's care](#) and expertise to our Ferncliff residents. The staff of this dedicated care unit provides extensive clinical support, therapies, and recreation for your loved one, along with emotional support for your family. Our goal is to help them best manage their symptoms and enjoy the highest quality of life they can while [living with Huntington's](#), ALS, and other neurodegenerative disorders.
