

# Use Google Calendar to Schedule a video conference in Google Meet

1. Go to [Google Calendar](#) and click anywhere in the calendar to create an event, then click **More options** in the lower right for the detailed event window.

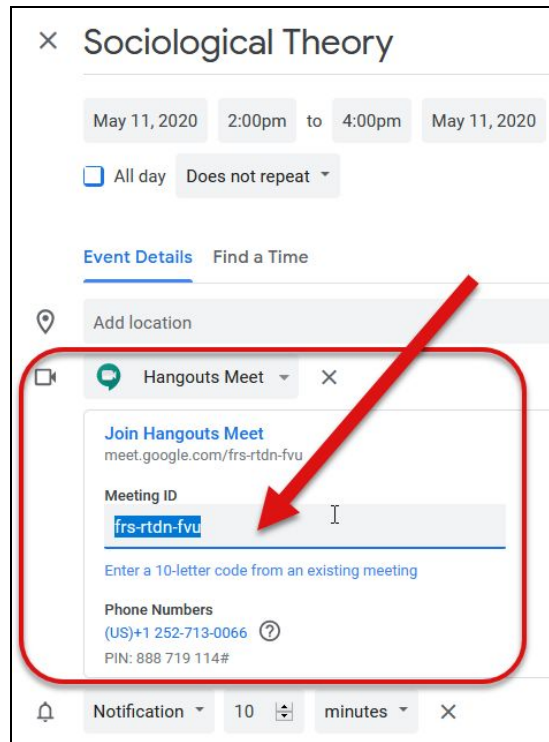

2. In the full event window,
  - a. **add your meeting name,**
  - b. **enter a date and time for your meeting,**
  - c. **invite your guests** (you can do this now, or copy the Meet details and forward to guests at a later time),
  - d. **click on add conferencing,** then select Hangouts Meet.
  - e. **click on the paperclip icon to add any files** here that you want to share with your meeting participants (see page 3 for more information),
  - f. **add a description or message to participants here,** if you wish.
  - g. click **Save** when you're done.

## View the details of your new, scheduled Meet event

Go to Google Calendar and click on your new meeting calendar event. If you click on **Hangouts Meet**, located under **Add conferencing**, you can see details of your new meeting.

Your **Meeting ID** for Meet can be found here:

**NOTE:** If you don't see the details of the meeting, click the dropdown arrow next to **Join Hangouts Meet**.

**IMPORTANT:** After you click **Save**, you'll be given the option to send invites to your guests. If you wish to do so, click **Send**. This will send an email invitation to your guests with information on how they can join your new video Meet session. Invited guests can then respond to the invite - if they confirm YES, the invite will be put on their calendar and you will see who has confirmed.

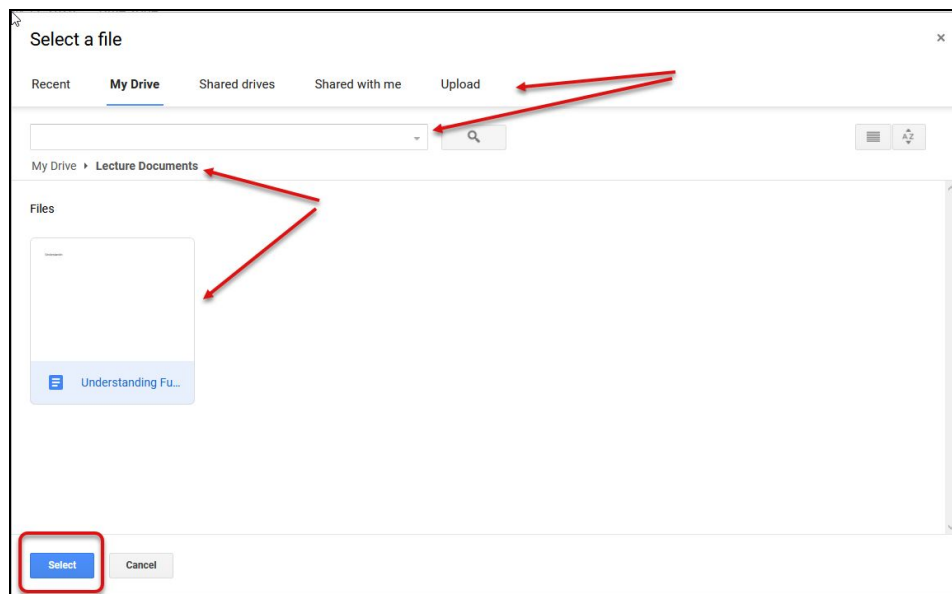

## Add a file to your meeting event

If you would like to add a file or files to the meeting event, click on the **paper clip icon** in the toolbar for the description box in the calendar event.

Then,

1. Click on one of the following tabs to locate your file:
  - Look in **Recent, My Drive, Shared Drives, Shared with Me**, or
  - **upload a file from your computer**, or
  - **search for the file within your Drive**.
2. Once you've located the file you wish to share, click on that file, then click **Select**.

Your file will be displayed in the description box. **Repeat this procedure to add multiple files.**
