

Play, share, or download a recording In Google Drive

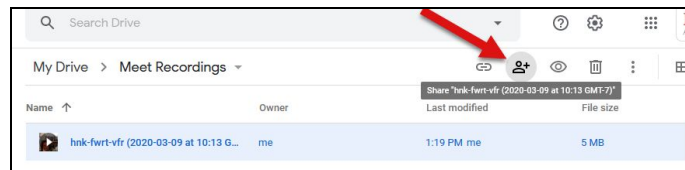

If you have recorded your Google Meet meeting, that recording is automatically saved to your (the event organizer's) Google Drive folder (**My Drive > Meet Recordings** folder).

1. Open **Drive**, locate the file in the **Meet Recordings** folder and double-click a recording file to play it.

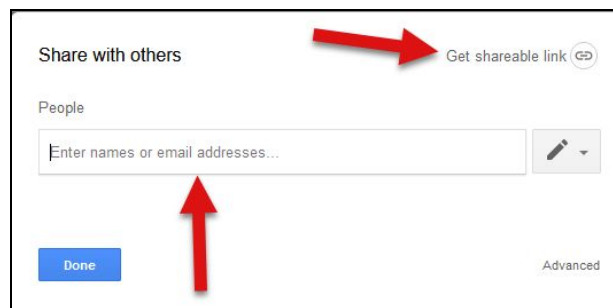

Select an option:

- To share a recording, **select the file** and **click the Share icon** in the toolbar.

- Enter a name or names in the text box and click **Done**. Or, click **Get shareable link** and paste the link in an email or chat message to people you want to share the video with.

- To download a recording, select the file, click the **three dot More icon** and then click **Download**. It will be saved on your computer.
